THERMAL TREATMENTS

THE BENEFICIAL PROPERTIES OF THERMAL WATERS

Water has the leading role in Val di Pejo: glaciers, lakes, snow and mineral springs are some of its expressions. At Terme di Pejo, the *Antica Fonte*, *Nuova Fonte* and *Fonte Alpina* springs help to cure in a natural way some disorders of the joints, the venous and linfatic flow, the skin, the respiratory tract, the gastrointestinal apparatus and the urinary tract.

The mineral springs of Val di Pejo originate in the bowels of the Ortles-Cevedale mountain massif, which encompasses the highest peaks of the Eastern Alps.

MEDICAL SERVICES PROVIDED

At Pejo Spa it is possible to benefit from the best spa treatments, even as part of the State Healthcare services, thanks to the presence of three different mineral springs – *Antica Fonte*, *Nuova Fonte* and *Fonte Alpina* – which are particularly suited to cure, in a natural way, many inconveniences of the joints, the venous and lymphatic flow, the skin, the respiratory tract, the gastrointestinal apparatus and the urinary tract.

HYDROTHERAPY

Fonte Alpina, poor in mineral salts, allows to eliminate the gallstone formations and the gravel located in the urinary system.

Antica Fonte, rich in iron and carbon dioxide, improves the biliary secretion, regulates the intestinal movements and rebuilds the iron reserves in case of anaemia due to lack of iron.

Nuova Fonte, thanks to the presence of bicarbonates and mineral salts, staunches acids and helps gastric emptying.

MUD-BATH THERAPY

MUD THERAPY

The application of muds ripened with ferruginous-bicarbonate mineral water from *Nuova Fonte* reduces joint inflammations and loosens muscular contractions. The treatment allows a protracted painkilling action.

THERMAL CARBON DIOXIDE BATH

Gases and mineral salts, in high concentration, donate relief against pains of a muscular and articular nature. During immersion, the carbon dioxide bubbles stick to the skin and perform a delicate and continuous micro massage: the general feeling you can experience is one of pleasure and relax.

VASCULAR THERAPEUTIC BATH THERAPY

The hydrostatics pressure and the chemical substances in the solution induce the activation of the network of small capillaries distributed in the skin and in the sub-cutaneous tissue. As a result of this intensive revascularization, fluid stagnations are drained, with a prolonged benefit for those suffering from dysfunctions of the arterial and lymphatic circulation.

INHALATION THERAPY

With the inhalation treatment the more or less finely fractioned thermal water, and the gas present in it, are introduced in the respiratory airways and the vaporization of *Antica Fonte* mineral water performs a direct action on the respiratory mucous membranes.

When contacting the mucous membranes of the respiratory tract, the microscopic particles of mineral water, rich in bicarbonates, contrast the inflammatory processes of allergic and chronic nature. The cure, repeated every day, has an anticatarrhal and decongestant effect, greater if undertaken continuously for 12 days.

PHYSIOTHERAPY - REHABILITATION

Rehabilitation in orthopedic pathologies and in the outcomes of a trauma is performed by physiotherapists in the thermal swimming pool. The *Nuova Fonte* mineral water makes the recovery of motility easier and contrasts articular pain. In order to make the recovery of the motor activities faster, it is possible to take advantage of the combination of professional physiotherapy and thermal hydrotherapy, particularly in the outcomes of sports accidents and traumas.

WELLNESS

AN ALL-ROUND WELLNESS EXPERIENCE

Terme di Pejo is not only a healing resort, but an authentic wellness oasis in a holistic sense, which you can turn to in order to recover your psycho-physical balance through a pleasant emotional and sensorial involvement.

The wellness centre is connected with the fitness area, composed of a fitness room and a gym with calisthenics, the swimming pool area and the massage and beauty treatment area.

Particular attention has been dedicated to energy saving and environmental protection through the use of eco-compatible and locally eco-friendly material, such as wood and stone.

MASSAGES

Through kneading and gradual pressures, the massage helps to loosen up muscular tensions, alleviate pains and drain fluids. In addition to the more traditional techniques aimed at rehabilitating particular body parts, at Terme di Pejo you can experience treatments coming from the eastern culture for a general relaxation and an energetic re-balance. Techniques proposed: general massage, anti-stress massage, sports massage, rehabilitation massage, lymph-drainage Vodder, Ayurveda, shiatsu, hot stone, plantar reflexology.

PARTIAL MASSAGE (25')

A soft and delicate full body massage that reduces stress and fatigue while restoring vital energy.

SHIATSU MASSAGE (55')

65.00 €

This type of massage, developed in Japan, combines acupressure and stretching of the body's muscles. Elbows, fingers and palms are used to apply pressure to the energy pathways in the body called meridians in order to restore balance in the energy system and harmony to the body.

THAI MASSAGE (55')

65.00 €

It combines the acupressure points of Chinese medicine with assisted stretching inspired one to yoga. It is practiced by coordinating the pressures and tractions with the patient's breathing, increasing vascular activity and promoting the release of toxins from the cells.

AYURVEDIC MASSAGE (55')

65.00 €

A traditional Indian technique that helps to restore the balance that exists between the three Doshas (Vata, Pitta and Kapha) with the use of precious oils. Re-establishes psychophysical harmony while providing energy and vitality.

CANDLE MASSAGE (55')

65.00 €

A gentle kneading and the application of vegetable butter, slowly warmed up on a flame and spread on the skin, loosen the muscle tension and restore tone and strength to the body.

LOMI LOMI MASSAGE (55')

65.00 €

This technique, which was developed in Hawaii, applies continuous rhythmic movements using hands and forearms just like gentle waves moving over the body.

HOT STONE MASSAGE (55')

65.00 €

Hot lava stones are directly placed on specific key energy points on the body and then used for a full body massage.

FOOT REFLEXOLOGY (55')

65.00 €

According to this ancient oriental art, the soles of the feet reflect the internal organs and various zones of the body. Therefore applying pressure on the nerve endings of the feet, revitalizes the body and activates self-healing processes.

INVIGORATING ARGAN OIL MASSAGE (55')

65.00 €

Argan oil is rich in linoleic acid, vitamin A and vitamin E. The qualities of this oil include internal and external healing as well as effective skin protection. This is a relaxing massage and the oil will also make skin healthy and glowing.

HEART AND MIND ALPINE MASSAGE WITH PINE TREE ESSENTIAL OIL (55')

65.00 €

Pine tree essential oil has always been used to provide well-being and serenity against the stress of daily life. It has an aromatic scent with a relaxing effect on the respiratory tract. The pleasant sensation of well-being that this massage provides has an antibacterial and purifying action, causing an immediate relaxing effect for body, mind and spirit.

PARTIAL LYMPHATIC DRAINAGE (25')

40.00 €

TOTAL-BODY LYMPHATIC DRAINAGE (55')

65.00 €

The Vodder method is a gentle manual technique that applies pressure on connective tissue in order to move fluid into the venous and lymphatic circulation which prevents stasis or swelling.

SEQUENTIAL PRESSURE THERAPY (25')

20.00 €

Gradual pressure is applied on the upper and lower limbs, the equipment enhances fluid flow in the body, therefore venous and lymphatic circulation is reactivated.

SEQUENTIAL PRESSURE THERAPY WITH BANDAGE (40')

40.00 €

The action of sequential pressotherapy is enhanced thanks to the use of caffeine bandages to obtain the maximum result of lightness of the legs. Thanks to the specific bioactive contents, this treatment stimulates detoxification and shapes the lower limbs.

LOCALIZED TONING MASSAGE (25')

35.00 €

Treatment that targets localized adipose deposits to reduce edema and increase firmness and elasticity.

SWIMMING POOL AREA

Swimming is the ideal exercise to strengthen and tone up your body, enjoying at the same time, a pleasant sensation of lightness: in the water the movements are easier and more fluid, as the joints don't have to sustain the weight of the body. The swimming pool area has the perfect structure and dimension for children of all ages, who, thanks to the immersion in water, live an experience of play and freedom.
