## SPA TREATMENTS

Water has the leading role in Val di Pejo: glaciers, lakes, snow and mineral springs are some of its expressions. At Terme di Pejo, the *Antica Fonte*, *Nuova Fonte* and *Fonte Alpina* springs help to cure in a natural way some disorders of the joints, the venous and linfatic flow, the skin, the respiratory tract, the gastrointestinal apparatus and the urinary tract.

The mineral springs of Val di Pejo originate in the bowels of the Ortles-Cevedale mountain massif, which encompasses the highest peaks of the Eastern Alps.

## MEDICAL SERVICES PROVIDED

At Pejo Spa it is possible to benefit from the best spa treatments, even as part of the State Healthcare services, thanks to the presence of three different mineral springs – *Antica Fonte*, *Nuova Fonte* and *Fonte Alpina* – which are particularly suited to cure, in a natural way, many inconveniences of the joints, the venous and lymphatic flow, the skin, the respiratory tract, the gastrointestinal apparatus and the urinary tract.

*Antica Fonte*, rich in iron and carbon dioxide, improves the biliary secretion, regulates the intestinal movements and rebuilds the iron reserves in case of anaemia due to lack of iron.

*Nuova Fonte*, thanks to the presence of bicarbonates and mineral salts, staunches acids and helps gastric emptying.

## MUD-BATH THERAPY

### MUD THERAPY

The application of muds ripened with ferruginous-bicarbonate mineral water from *Nuova Fonte* reduces joint inflammations and loosens muscular contractions. The treatment allows a protracted painkilling action.

### THERMAL CARBON DIOXIDE BATH

Gases and mineral salts, in high concentration, donate relief against pains of a muscular and articular nature. During immersion, the carbon dioxide bubbles stick to the skin and perform a delicate and continuous micro massage: the general feeling you can experience is one of pleasure and relax.

When contacting the mucous membranes of the respiratory tract, the microscopic particles of mineral water, rich in bicarbonates, contrast the inflammatory processes of allergic and chronic nature. The cure, repeated every day, has an anticatarrhal and decongestant effect, greater if undertaken continuously for 12 days.
